LinkedIn Profile | GitHub Portfolio

PROFESSIONAL SUMMARY

Results-driven GenAI & React Full-Stack Developer with 3 years of hands-on experience building enterprise-grade web applications and production-deployed Generative AI solutions. Proficient in React.js, Python, FastAPI, and LLM API integration (OpenAI, Anthropic Claude, Google Gemini). Deep expertise in Retrieval-Augmented Generation (RAG), Multi-Agent Systems, Prompt Engineering, and Vector Databases (Pinecone). Independently designed, built, and deployed 7 end-to-end AI applications — including multi-agent financial research, accessibility systems, job platforms, and conversational AI. Seeking a GenAI / Full-Stack Developer role to drive innovative AI product development.

KEY SKILLS

GenAI & LLM	Generative AI · LLM Integration · Prompt Engineering · RAG · Conversational AI · Agentic AI · Multi-Agent Systems
AI Frameworks	LangChain · LangGraph · CrewAI · OpenAI API · Anthropic Claude · Google Gemini · RAGAS · Streamlit
Frontend	React.js · Redux · JavaScript (ES6+) · HTML5 · CSS3 · Responsive UI · Vite
Backend	Python · FastAPI · REST APIs · Pinecone · SQL
DevOps	Git · GitHub · Vercel · Streamlit Cloud · VS Code · Postman

WORK EXPERIENCE

Software Developer | Aerosimple

Jan 2024 – Present | Bangalore, Karnataka

Enterprise airport operations SaaS platform — React.js modules serving global airport clients in USA, Europe & Asia-Pacific.

- Designed and developed enterprise-grade modules — Forms Management, Inspections, Work Orders, Wildlife Log Management, and Permit Management — using React.js, Redux, and REST APIs.
- Built reusable, scalable UI component libraries adopted across 5+ product modules, improving development efficiency by 40%.
- Integrated complex REST APIs and third-party services, optimising data flow between React.js frontend and backend services.
- Enhanced frontend performance via code splitting, lazy loading, and React optimisation patterns for global airport operations workflows.
- Collaborated cross-functionally (product, QA, backend) in Agile sprints to deliver compliance-driven software on schedule.
- Resolved critical production issues and reduced bug backlog through systematic root-cause debugging and rigorous code reviews.
- Independently built 7 production GenAI projects alongside core duties — demonstrating self-driven initiative in Generative AI.

PROJECTS — PRODUCTION DEPLOYED

FinAgent — Multi-Agent Financial Research System

May 2026

- Built a 4-agent pipeline (Orchestrator → Research Agent → Analysis Agent → Report Writer) using Google Gemini 1.5 Flash for real-time financial research and stock analysis.
- Agents run in parallel threads; Orchestrator uses StateGraph pattern for task routing and shared-state management — equivalent to LangGraph architecture.
- Tech Stack: Python, Google Gemini API, Multi-Agent Systems, yFinance, Streamlit, Plotly.

BridgeAI — Accessibility Multi-Agent Vision System

May 2026

- Developed a 6-agent accessibility system (Vision, Scene, Emotion, Context, Alert, Narrator) coordinated by an Orchestrator that routes tasks, handles failures, and maintains session memory.
- Multimodal pipeline combining computer vision (OpenCV) + LLM reasoning + Text-to-Speech for real-time, hands-free accessibility interaction.
- Tech Stack: Python, Google Gemini API, OpenCV, Pillow, gTTS, Multi-Agent Orchestration, Streamlit.

VisionAI — Multimodal GenAI Vision Assistant

Apr 2026

- Built a production-grade multimodal AI assistant capable of scene analysis, object detection, and contextual narration using computer vision + LLM fusion.
- Tech Stack: Python, Google Gemini 1.5 Flash, OpenCV, numpy, Streamlit.

HireFlow — AI-Powered Resume Search Platform

Apr–May 2026

- End-to-end RAG system using hybrid BM25 + Pinecone vector search for intelligent resume-to-job matching, with Google Gemini API for LLM-based candidate re-ranking.
- Implemented Reciprocal Rank Fusion (RRF) for improved ranking accuracy; validated retrieval quality using RAGAS evaluation metrics.
- Tech Stack: Python, FastAPI, Pinecone, Google Gemini API, BM25, RAGAS, Streamlit.

Hirrd — AI Job Platform

May 2026

- Live: hirrd.vercel.app
- Full-stack AI-powered job search platform with offer analyser, mock interview coach, AI cover letter generator, salary calculator, and career roadmap builder.
- Integrates Claude API for all AI features: resume parsing, job-fit scoring, interview feedback, offer analysis, and negotiation scripts.
- Tech Stack: React.js, Vite, Claude API (Anthropic), Adzuna Jobs API, Vercel.

Personal AI Assistant

Feb–Mar 2026

- Live: mygenaiassistant-genai.streamlit.app
- Production-deployed Conversational AI assistant using LLMs (OpenAI, Claude) with contextual memory, few-shot prompt engineering, and task automation workflows.
- Tech Stack: Python, OpenAI API, Anthropic Claude API, Prompt Engineering, Streamlit.

Scam Detection System

Jan–Feb 2026

- Live: scam-detection-genai.streamlit.app
- NLP + LLM classifier detecting phishing patterns, fraud indicators, and suspicious communication with explainable AI risk scoring.
- Tech Stack: Python, LLMs, NLP, Text Classification, Streamlit.

KEY ACHIEVEMENTS

- ★ Deployed 7 production-ready GenAI applications — FinAgent, BridgeAI, VisionAI, HireFlow, Hirrd, Personal Assistant, Scam Detector — demonstrating end-to-end AI product ownership.
- ★ Built full Multi-Agent Systems (4–6 specialized agents) with Orchestrator patterns, parallel execution, and session memory — equivalent to LangGraph architecture.
- ★ HireFlow's RAG pipeline with RAGAS evaluation metrics — a rare production-quality combination that distinguishes from theoretical GenAI knowledge.
- ★ 3 years of enterprise React.js at Aerosimple serving global airport clients — production-grade, compliance-driven, not academic.
- ★ Self-trained in Generative AI with 7 deployed projects while working full-time — demonstrating exceptional initiative and execution.
- ★ Completing Gen AI & Multi-Agent Systems certification at Coding Ninjas — staying ahead of the industry.

EDUCATION

B.Tech — Computer Science & Engineering | RGUKT Srikakulam *2019 – 2023*

Rajiv Gandhi University of Knowledge Technologies, Srikakulam, Andhra Pradesh

CERTIFICATIONS & COURSES

Gen AI & Multi-Agent Systems | Coding Ninjas *2026 – Present (In Progress)*

MERN Stack Development | NxtWave (CCBP 4.0) *2022 – 2023*

ADDITIONAL INFO

Primary Skills	React.js, Python, Generative AI, LLM Integration, Multi-Agent Systems, RAG, FastAPI, JavaScript
Notice Period	30 – 45 Days
Preferred Locations	Hyderabad · Bengaluru · Remote · Visakhapatnam · Chennai · Pune
Expected CTC	7 LPA

I hereby declare that the above information is true and correct to the best of my knowledge.
